The mission of The Greenway Foundation (TGF) is to revitalizing rivers and reconnecting communities. focusing primarily on Colorado & the western United States. We create & nurture opportunities & initiatives that bind our communities together, through the lens of our most vital resource, water.

We advance a sustainable water future by educating students through South Platte River Environmental Education (SPREE), protecting our waterways through water quality & quantity initiatives, revitalizing the South Platte River watershed and beyond through long-term enhancement projects, and celebrating our River with community-centered events.
We're excited to share some of our proudest moments of 2021 as we continue the work to revitalize rivers & reconnect communities.
43% of SPREE schools serve over 90% students of color. SPREE schools receive discounted field trip pricing, early sign ups, and bring all of their students to a SPREE trip every year.

93% of students who attend a SPREE excursion receive discounted, need-based pricing.

4 high school students were hired over the summer, learning the principles of environmental education, developing public speaking skills, and writing camp curriculum.
My daughter loved it! She gives it 5 stars!

- Ana R, SPREE Summer Camp Parent
Denver One Water Plan went live in the fall of 2021 and is open for public comment. TGF members were part of the Core Planning Team developing a plan for One Water, a holistic approach to water management that integrates land use and water resource planning.
TGF collaborated with the Denver Metro Chamber of Commerce to host Trout Tank Sustainability, a business accelerator program for environmentally-minded startups. 18 start-ups applied to be part of this year’s cohort.
6.5 miles of the South Platte River will be further transformed and vegetated wetlands will be restored through the Denver Urban Waterways Project.
Official authorization of a collective $500+ million investment for Denver's South Platte Watershed and beyond for both flood protection & ecosystem restoration benefits.
celebrated the River, the continued work of The Greenway Foundation, and Hero of the River Award winner, Denver Water, at the 10th anniversary of Gala on the Bridge.

500+ attendees
4325 gallons of trash were removed from parks along the South Platte by TGF staff & volunteers.

585 invasive snails were removed from the South Platte River by TGF staff & campers.
continue on our journey

The Greenway Foundation accomplished so much in 2021, including going virtual when necessary! Check out our online 2021 Year in Review to discover how we transformed our education programs to reach Denver students, the hard-fought victories we won to protect our rivers statewide, and what big changes are coming.
